

Workers of Poshineh Waving gathered in front of Governor Office

The regime's news agency IRNA reported, " more than 250 workers of Poshineh Waving of Ghazvin, gathered in front of Governor Office in city of Alboorz due to not payment of 3 months salary." The report adds that this gathering ended up due to interference by police forces.

The capitalists who are getting more and more profits of tens of thousands of workers even do not accept to pay the minimal wages and all the time by making excuses refusing paying the workers in several months.

In this country no one question why the capitalist do not pay wages and no one cares about considering workers' rights but as soon as workers in order to get their rights to exist organize any protest actions, the consequences will be suppression and arrests.

There is no a single week in which there is no protest by workers but the regime's only solution is suppressing them by barbaric ways.

These barbaric suppression against workers not only stopping workers from struggling but also make them more sever to fight for their own rights and demands. That is why Poshineh workers have announced that these suppressive measurements will not stop them and they will take more sever actions if their demands will not be considered.

Retroactive wages should be paid immediately. Dismisses of workers should be stopped. Wages should be increased. All the workers should be employed officially.

Overthrow the Islamic Republic Regime- Establish Soviet State

**Down with capitalism Long live socialism
Work – Bread – Freedom a soviet state**
